

# AUNDE Standard for PPAP documentation

Dear Customer,

In conformity with the standard IATF 16949, AUNDE will handle the initial sample inspection according to the OEM specifications/ requirements.

The form to be used depends on the OEM. Either AIAG- or VDA- Standard will be used for the initial sample inspection. If an OEM requires further standards, AUNDE will comply to those.

For the internal know-how protection, the standard PPAP documents of AUNDE Group are maximum level 2. All documents such as FMEA, Control Plan, MSA-studies, etc. will not be distributed. Our customers are welcome to review these documents on our premises.

After completion of the initial sample process, we ask within 14 days that the signed release document be sent without reminder. If we do not receive any feedback from your side, we will assume that you have given your approval for further orders/ requests!

For any further information regarding PPF/ PPAP, please feel free to contact us.
